**SUMMARY OF REPORT:**

This paper presents the financial position for the ICB and the ICS for the period to the end of November 2022 (Month 8). Given the ICB became a statutory body on 1 July 2022, the ICB position represents a combination of the CCG reported positions for Quarter 1, and the first five months of the new ICB body, to provide a full position for the financial year-to-date position and forecast.

**Key messages are as follows:**

**H&NY ICS Integrated Care Board (ICB) revenue position**

- At the end of Month 8, the ICB has reported a small variance of £112k against plan relating to asylum seeker expenditure incurred to date. This variance is expected to be offset by an NHSE allocation in future months.
- The ICB forecast is for a break-even position.

**H&NY ICS Provider revenue positions year to date**

- Across H&NY providers, there was a year-to-date deficit of £11.6m, against a planned surplus of £0.6m, resulting in an adverse variance of £12.2m.
- The forecast for the full year is a breakeven position. This is in line with plans submitted to NHS England.

**Capital**

- Total spend against operational capital to the end of November 2022 was £54.9m against a plan of £87.5m, resulting in a year-to-date underspend of £32.6m.
- There is a forecast underspend of £2.6m. This is made up of £1.3m associated with a capitalised lease offset by an £4m underspend against medical equipment. The ICB are seeking clarification of the availability of additional central resources to fund the lease issue.
